

Week 29 Pre-Algebra Assignment:

Day 1: pp. 588-589 #1-22, 29-34

Day 2: Chapter 13 test

Day 3: Study for final exam

Day 4: Study for final exam

Day 5: Study for final exam

Notes on Assignment:

Pages 588-589: (#1-22, 29-34)

Chapter Review – no notes.

Work to show:

All problems: Calculators are allowed on this assignment.

All problems: Write down formulas being used, fill them in with the known quantities, and solve for the unknown quantity.

Chapter 13 test:

For the test:

- Find the area of polygons and circles.
- Find the area of shaded regions.
- Use area formulas to find missing measurements.
- Find the surface area of prisms and cylinders
- Find the volume of prisms, cones, and pyramids
- Use volume formulas to find missing measurements.

*You may use a calculator on this test but make sure to show your equations and formulas so there is a chance for partial credit. Also, you will need to memorize the area and volume formulas that we studied in this chapter. They will not be provided for you.
