

# CHAT Web Design Knowledge Review

## Chapter 4

Answer the following questions. (1 pt. each)

1. How do most browsers represent text surrounded by <strong> tags? (Try it and see if you need to!)
2. What HTML would you use if you if you wanted to make a heading for your page entitled "This & That"?
3. What do we call the address for web page?
4. The title attribute creates a tool tip in most browsers. What is a tool tip?
5. List one Windows FTP program
6. Give an example of a domain name.
7. What are the three parts of a typical URL?
8. What is an absolute path?

9. What file does a web server look for if you ask for a directory without a file name?
  
10. Which attribute allows us to link to a specific place in a web page?
  
11. When should you use absolute links in your web pages instead of relative links?
  
12. Write an `<a>` element that creates a link from `<h2>Who Eats Bananas? </h2>` in your web page to `<h1 id="bananas"> Monkeys Love Bananas! </h1>` on `http://www.monkeys.com/food.html`, a website that is not part of your website.
